EDUCATION

Rotterdam School of Management, Erasmus University MS in Business Analytics & Management GPA: 8.25/10 (Cum Laude)	Rotterdam, Netherlands <i>Sept. 2024 – Jul. 2025</i>
Peking University BA in Advertising GPA: 3.63/4	Beijing, China <i>Sept. 2020 – Jul. 2024</i>
◦ Awards: 2024 Graduate Scholarship, 2023 Exchange Scholarship, 2021 Beijing Government Scholarship	

RESEARCH PROJECTS

Master's Thesis: Discount Optimisation in DTC Email Marketing (8/10) <i>Under Armour Europe BV × Rotterdam School of Management</i>	<i>Mar. 2025 – Jun. 2025</i>
◦ Built an end-to-end personalized discount optimization pipeline: K-means customer segmentation, propensity score estimation (logistic regression), IPW-adjusted causal forest (EconML), and off-policy evaluation (OPE). ◦ Estimated heterogeneous treatment effects (CATE) across 4 customer segments; dual-threshold policy (purchase probability ≥ 0.70 , uplift ≥ 0.01) achieved +1.22 margin uplift per customer and 82.2% discount cost reduction vs. historical policy. ◦ Validated robustness via 500-sample bootstrap (95% CI [0.0058, 0.0070]) and recall test (0.98) on held-out data.	
Bachelor's Thesis: Evaluating GenAI Text Quality in Professional Writing (95/100) <i>Peking University</i>	<i>Nov. 2023 – Mar. 2024</i>
◦ Corpus analysis of 620 <i>People's Daily</i> obituaries (2016–2023); Python (Jieba, TF-IDF) + move analysis (Swales 1990) to extract standardized rhetorical structure across three subject categories. ◦ Trained Kimi Chat (LLM) on annotated corpus; AI-generated obituaries achieved cosine similarity of 0.91 with held-out military-official originals.	

PROFESSIONAL EXPERIENCE

Commercial Intelligence Pipeline — Reederei Nord BV github.com/yoojinshim/reedereiProject 🔗	<i>Apr. 2026</i>
◦ Audited 9 datasets (711 voyages, 2022–2024) for a crude tanker operator; delivered three quantified commercial findings to the MD including a \$3.5M TCE gap and \$351K–\$737K in understated demurrage revenue. ◦ Built a reproducible Python/SQL ETL pipeline (DuckDB Star Schema), Streamlit dashboard, and an LLM extraction pipeline (Claude Sonnet) on 711 broker recap emails, reducing null rate from 21% to 5.4%.	
Pricing Analyst Intern <i>Under Armour Europe BV</i>	Amsterdam, Netherlands <i>Feb. 2025 – Jun. 2025</i>
◦ Built ML-assisted discount optimization models and GMV incentive frameworks; data pipelines in SQL, modeling in Python. ◦ Delivered pricing recommendations adopted in seasonal campaign planning across EU markets.	
E-commerce Analyst Intern <i>Kuaishou Technology — Food & Health Team</i>	Beijing, China <i>Aug. 2023 – Nov. 2023</i>
◦ Designed a tiered GMV incentive framework ($0.8 \times / 1.0 \times / 1.2 \times$ multipliers on a rolling 90-day baseline) for key merchant accounts; analyzed multi-channel performance (GMV, engagement) via SQL to calibrate targets. ◦ Optimized ETL pipelines and BI dashboards to enable real-time in-campaign decision-making, reducing time-to-insight within active campaign cycles.	

SKILLS

Languages: English (fluent), Cantonese (basic), Mandarin (native), Korean (native).
Programming: Python, SQL, HTML/CSS.
